TAKEN UP

The latter part of May, at my place near Reige, German precinct, 1 gray mare about 12 years old, branded on left shoulder and T on right shoulder: weight about 850 pounds. W. A. WILSON.

173 PER CENT, ANNUALLY. That's the Profit-Copper, the Article-Mexico, the Country.

"El Progresso" in its group of six mines has some of the rtchest copper ores in the richest mining country in the world Ore runs 12 per cent copper, 12oz. silver, a trace of gold, total value, about \$48 a ton, and in two of the mines, in addition to copper and silver, ore contains 3 percent to 51/2 per cent quicksilver or merculy, about \$105 a ton. The great Lake Superior copper mines-Calumet, and Hecla, Wolverine and Tamarack, Quincy, etc. - that annually return millions, run only from \$3 to \$13 a ton. Boston and Montana six years ago sold for \$15 a share, to-day. \$275, paying 240 per cent on the investment. United verde sold for 500 a share, today stock not in the market and pays 8.666 per cert on investment. Calumet and Hecla sold for \$1 a share, to-day worth \$800, and pays on investment 10,000

Entire capital stock of United Verse was offered for \$150,000 and refused. Senator Clark, later, paid \$260,000, and to-day he has annual income from this property of over \$13,000,000.

If this is possible here with labor six times gigher than in Mexico, with ore five times less valuable, wite fuel five times dearer, and every toing else in proportion, do you doubt that El Progress will return 173 per cent and more, anna-fly, to original investors, to first stockhold-ers who contribute the money to start "the ball olling," who are on the "groun I floor?" Am experienced, know the country, the people, the language, lived there 18 years, and know the mines of this section of Mexico, and unhesitatingly state El Progreso is the best; have been worked for generations in a Mexican way, and supplied the copper for the surrounding country. No attempt was ever made to ex-

tract the gold, silver or quic-silver. A modern 40-ton concentrating and smalting plant—smelting only the \$43 ore—will return \$400,000 per annum; thus \$43, \$10 for treatment, equals \$33x40 tons equals \$1,320 a day, for 300 days equals \$396,000. This will pay 26 per cent on \$1,500,000 total capitalization. Par value of shares \$1.00. 900,000 shares are treasury stock, and 400,000 of this to be sold very low to raise money to start things when price will be greatly advanced -100,000 at 12c (all sold), 100,000 at 15c, 100,000 at 20c, 100,000 at 25c.

If Stock No. of 25c.....4104 Per Ct....(26x4 104 Per Ct) 50c.....2 52 Per Ct....(26x2 52 Per Ct.) \$1.00...1 26 Per Ct....(26x\$1..26 Per Ct)
The best chance ever offered of securing stock in a legitimate copper mining enterprise.
